Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representatives indicated that, in the inventive example 1, the polymer supported catalyst has higher activity and produces polymer with higher branching index compared with comparative example 2. However, the polymerizations for example 1 and comparative example 2 were not conducted under the same condition, example 1 in gas phase and comparative example 2 in slurry. Therefore, applicants are advised to provide further evidence to show unexpected results.
